Average Revenue Per Session

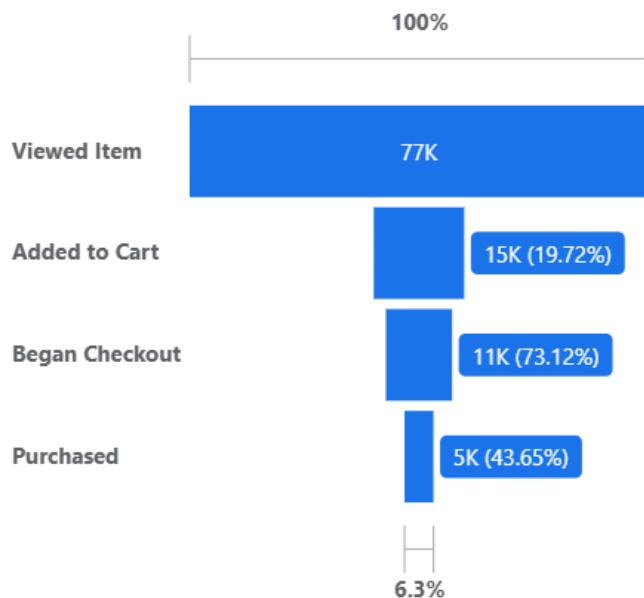

68.08%

Cart Abandonment Rate

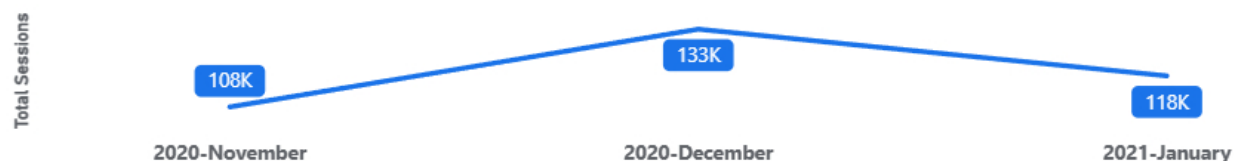

- **6.3% of visitors complete a purchase** — the steepest drop-off is View → Cart (80.3% never add to cart)
- **Cart abandonment sits at 68%** — 2 in 3 who add an item leave before buying
- **US drives 43.7% of revenue**; India and Canada are distant runners-up

- **Referral converts revenue 53% better than organic** per session (\$1.15 vs \$0.75), despite far less traffic
- **Sessions peaked in December** (133K) and declined into January (118K)

referral

Total Sessions by Traffic Medium

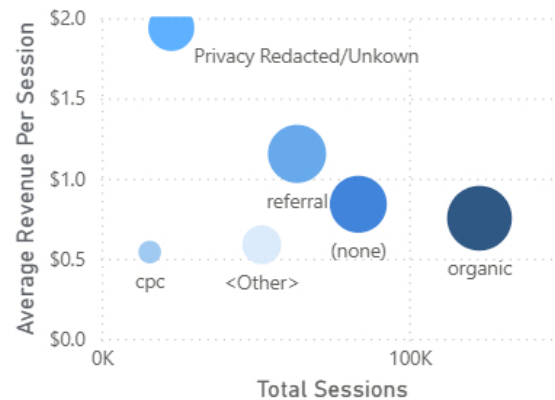

Average Revenue Per Session by Traffic Medium

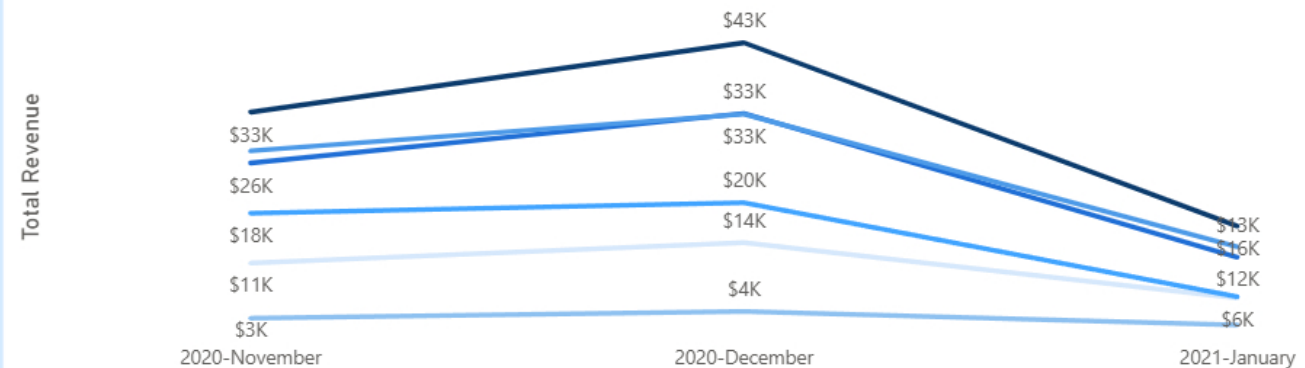

- **Organic drives the most volume** (123K sessions, 34% of total) but converts modestly
- **Referral outperforms on value**: \$1.15 revenue/session vs. \$0.75 for organic — despite far fewer sessions (64K)
- **CPC underperforms** (\$0.54/session) despite being a paid channel — worth reviewing spend efficiency
- **Privacy Redacted/Unknown traffic** shows the highest revenue/session (\$1.94), but reflects GA4's removal of unreliable/PII-flagged source data — treat as low-confidence, not a real top performer
- **Recommendation**: shifting incremental investment toward referral partnerships likely yields better return than scaling organic or CPC further

Traffic Source	Total Sessions	Total Revenue	Conversion Rate
(direct)	83459	\$70,096.00	1.29%
<Other>	97289	\$69,747.00	1.11%
google	128296	\$93,901.00	1.09%
Privacy Redacted/Unkown	22236	\$43,497.00	3.14%
shop.googlemerchandisestore.com	28849	\$41,549.00	2.03%
